CLASS DIAGRAM - Aplikasi StudyFlow (Manajemen Tugas Mahasiswa + Integrasi LMS)

KETERANGAN

: Class Utama

: Master Data (Mata Kuliah & Jadwal)

CATATAN

- User = auth.users + profiles (Supabase). Class lain punya atribut user_id (FK) ke User; relasi ke User hanya digambar untuk class utama agar mudah dibaca.
- Setiap Task terkait satu Course; Task punya banyak checklist, catatan, rencana belajar (StudyPlan) dan materi (TaskMaterial).
- Task.priority: low | medium | high | urgent. Task.status: not_started | in_progress | revision | completed. Task.progress: 0-100.
- StudyPlan.risk_level: low | medium | high. AISuggestion.type: task_breakdown | study_plan | priority | notes_summary | material_breakdown | material_quiz.

: AI / Rencana Belajar / Materi

: Pendukung / Notifikasi

: Integrasi LMS (Unindra)

• NotificationLog.reminder_type: deadline_tomorrow | deadline_today | overdue_task | today_schedule | test_message. channel = telegram.
• LmsConnection.status: disconnected | connecting | connected | expired | error. Password LMS tidak disimpan (hanya session_reference).
• Multiplicity: 1 = tepat satu, 0..1 = nol atau satu, 0..* = nol atau banyak.
