started_at = "2026-10-21 06:54:50"
finished_at = "2026-10-21 06:55:00"

KETERANGAN

- : Instance Class Utama
- : Instance Master Data
- : Instance AI / Rencana Belajar / Materi
- : Instance Pendukung / Notifikasi
- : Instance Integrasi LMS

CATATAN

- user1 (Andi Pratama) memiliki 2 mata kuliah (course1, course2) dan 2 tugas (task1, task2).
- task1 (prioritas high, status in_progress) milik course1; task2 (prioritas urgent, status not_started) milik course2.
- task1 punya 1 checklist, 1 catatan, 1 saran AI, 1 rencana belajar (dengan 1 item), dan 1 materi PDF (dengan 1 percobaan kuis, skor 4/5).
- log1 adalah pengingat Telegram "deadline_tomorrow" untuk task2 yang sudah terkirim (status sent).
- lms1 menghubungkan user1 ke LMS Unindra; sinkronisasi mata kuliah (sync1) berhasil dan menghasilkan lmsCourse1.
- Nilai id disingkat (mis. "u-001") dari tipe uuid agar mudah dibaca; atribut user_id/created_at pada beberapa objek anak dihilangkan.
